Waste Per Se

Case Studies

Waste Per Se specialise in the collection and treatment of agricultural wastes and animal by-products. Its subsidiaries, WRE Collection Services and WRE Disposal Services are going through a period of unprecedented operational growth and approached DPS International with a view to selecting a vehicle routing and scheduling package for rapid deployment. They chose logixcentral.

Managing Director, Ian Bryan, commented:

"We are delighted to have secured access to this innovative product which combines proven performance and a high level of functionality with a low entry cost per site. Since acquiring logixcentral we have already secured two multi-site accounts where the ability to confidently predict our base costs and service levels were key to securing agreement with new customers."
