

Case Studies

ACS&T are specialists in temperature-controlled storage and national distribution to the food industry. Distribution depots (multi-drop) use PC deployed LogiX for route planning. PC deployed LogiX is also used for transport analyses and business development.

Ashley Sharman, Managing Director, says:

“LogiX is a flexible transport planning tool that has met ACS&T’s business requirements. It has benefited the company through improved visibility of routes and the efficiency in which these are defined.”
