

Regions – called *kommuner* in Swedish – now have efficient planning of homecare staff with full consideration of each patient's special needs.

www.carmenta.se

Integration with LogixIE creates opportunities for partners

Carmenta is the main supplier of real-time GIS systems in Sweden. Sales include both important Swedish clients such as Swedish Defence and SOS Alarm as well as international clients like the Dutch Army.

Carmenta now offers a solution for homecare planning using Carmenta's mapping system ResQMap and the DPS optimisation tool LogixIE. The benefits for the user are an easy-to-use system completely adapted to the special needs of homecare planning – but using the most efficient logistic optimisation system embedded: LogixIE.
