“It’s unthinkable to be without the route planning system”

Ronnie Öberg, Transport Planner

Spendrups Brewery is Sweden’s leading brewery. PlanLogiX has been used operationally since 1995. Initially the system was used in the DOS version showing very good results for the demanding planning of 35 trucks in Stockholm.

Now 32 bit PlanLogiX is used for the planning all over Sweden using detailed road data from Navteq and direct links of planned routes to handheld computers.

For almost a decade, DPS has provided quality route planning and optimisation systems for Spendrups Brewery.
