

SAP R3 and LogiX – Caradon case

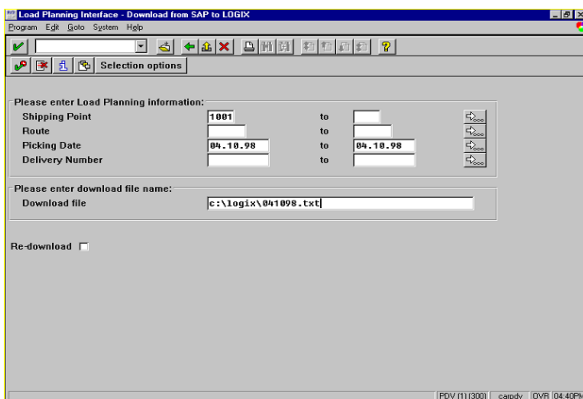

Caradon Plc one of UK Top 500 companies using PlanLogiX

One of the integration methods PlanLogiX allows is file based communication to ERP systems such as SAP R3. The planning procedure could be described in five steps:

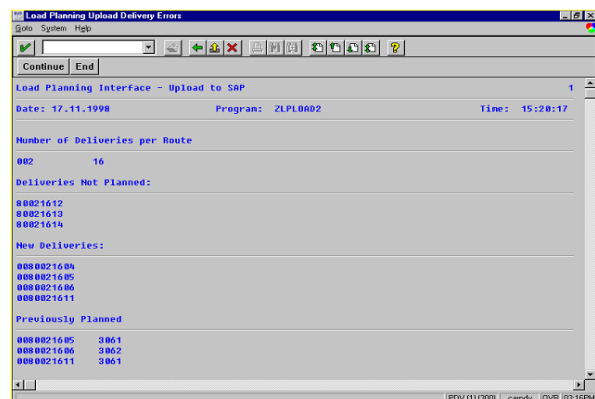

1. Download data from corporate system
2. Plan automatically
3. Adjust manually
4. Consistency check
5. Upload to corporate system

PlanLogiX generates optimal routes for large geographic areas with allowance for full manual control of single route details.

Downloading of order data from SAP to PlanLogiX

The result is checked for consistency in the R3 environment and then distributed to the corporate system.
